Professional Experience

- Uday is a Chartered Quantity Surveyor and a qualified Forensic Delay Analyst (BTEC level 7 certified) with the capacity to cover all aspects of delay analysis and project planning.
- Uday started working for a reputed contractor (Khansaheb) in the UAE. He initially worked as part of the tender planning team in the tendering department and later he worked with the site execution team. During this time, he has worked on various types of projects and values (circa AED 140 million to AED 400 million) and handled multiple projects simultaneously.
- Currently, Uday is working as a Sr. Forensic Delay Analyst for projects of various types and values (circa AED 180 million to AED 3 billion) for top-tier firms in the UAE and internationally. He leads a team of four delay analysts who directly report to him.
- He has built good management capabilities through his experience in supervising a team, and developed a wealth of business knowledge from being part of projects with different values and scales throughout their life cycles.
- He is able to investigate the critical delays on a project with his analytical knowledge and positive attitude.
- He is highly proficient in different delay analysis methodologies that are practiced throughout the industry. He also has a thorough knowledge of the SCL protocols and AACE international recommended practice No. 29R-03.
- He can carry out an accurate concurrent delay analysis with the ability to effectively communicate the findings of the analysis to the clients or their representatives.
- Uday is experienced in drafting expert witness reports during the arbitration/ adjudication process.
- He is also skilled in establishing and managing planning activities during the execution stage.
